

Get in the Mix

with Larry Carlton

Session Masters Puts You there!

Your Dream Session.

Session Masters puts YOU in the studio alongside 4-time Grammy winner Larry Carlton with top-notch session players Jeff Babko on keys, Travis Carlton on bass and Toss Panos on percussion.

In the control room, hitmaker Csaba Petocz dials in the perfect mix for your standout performance on 10 original tunes written by Larry Carlton exclusively for Session Masters.

Pull out one of the player's parts altogether and replace it with your own. Lay down vocals, add guitar parts, double up the drums, bring in your own horn section, sample, edit, cut, paste or rearrange the tunes completely – it's your dream session.

Sing. Play. Produce.

Whether you play, sing, sample or produce, Session Masters puts you in complete control. You get all of the masters, which were recorded in HD at a sample rate of 96 and 48k and are compatible with virtually any recording and editing software including Pro Tools, Digital Performer, and Logic 8. Sheet music for all parts across 10 tunes are also included.

Record your own solos or jump into the rhythm section and comp for Larry and Jeff's solos. Write lyrics and add a vocal part to any of the ten tunes. Add strings, percussion, horn parts or compose entirely new melodies over the rhythm sections – you're in the producer's seat!

A 10-camera, multi-angle video library of the actual sessions steps you through the rundown with the musicians, the recording session itself with Larry and Csaba's creative and production commentary for all ten tunes.

Promote. Market. Sell.

Everything you create with Session Masters tracks is YOUR music. Record a song or produce an entire album (your credits will be quite impressive). Promote and sell your music online, at gigs, in stores, wherever and however you wish. Do it for the bragging rights and experience, or go for the Grammy!

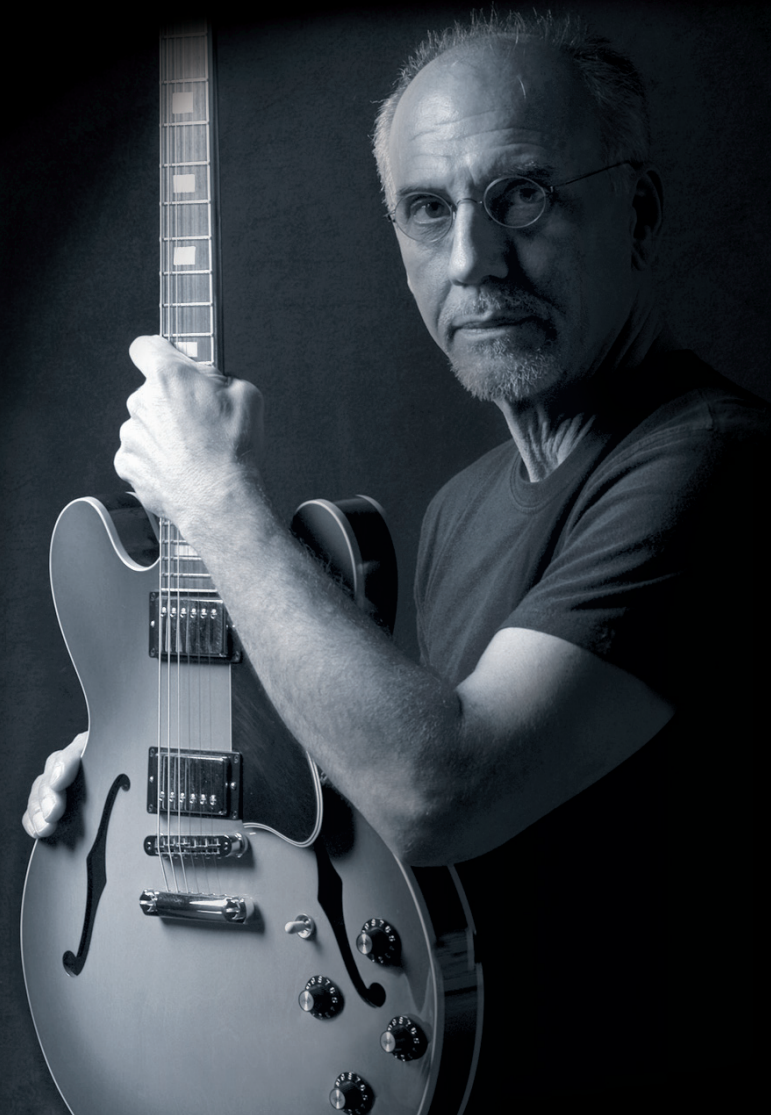

Your Session Masters includes expert instruction to help you through every step. We'll teach you how to license the publishing, master your music, duplicate, package, distribute online, promote to radio and market your finished project.

"I'm really excited about getting to record and work with so many different musicians, producers and engineers around the world. I've written these 10 tunes with precisely that in mind, and so you'll find that with a little creativity on your part, you'll make each of these tunes your own."

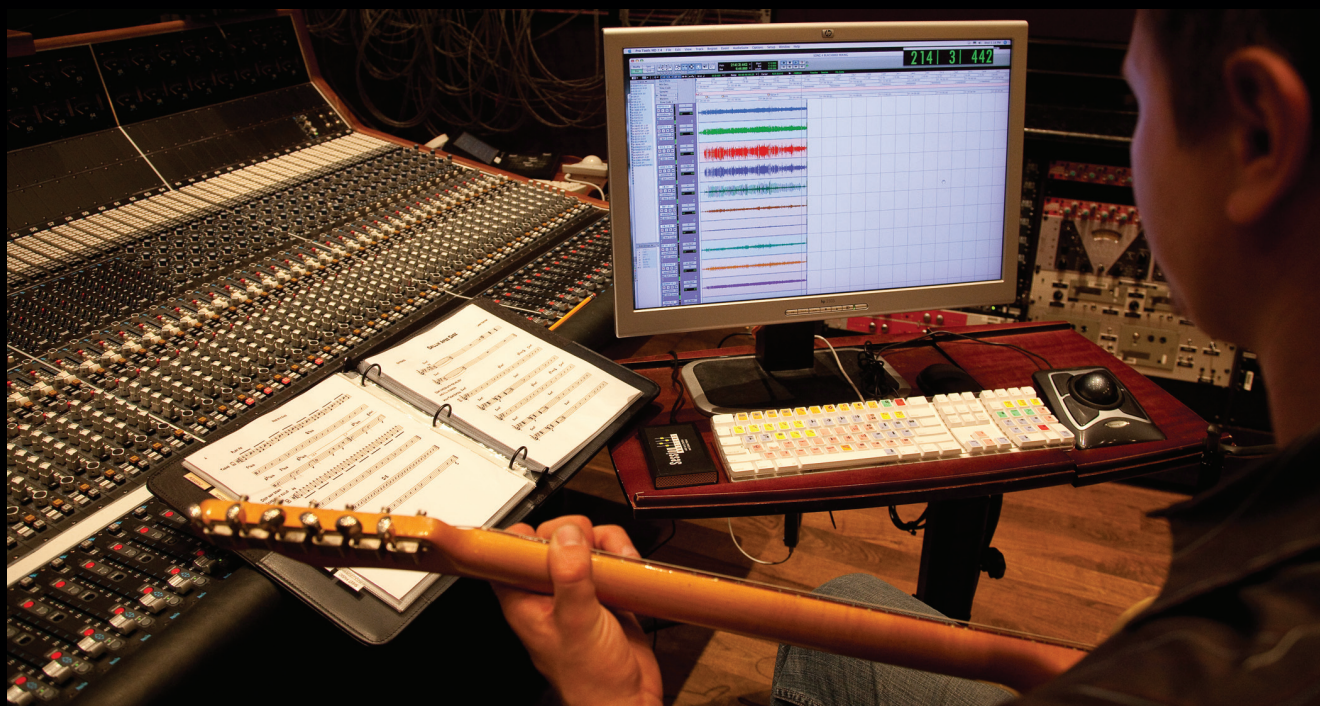

—Larry Carlton
